Application Attachments Checklist

☐ Location Map (Required)	Required to show the location of the project within your community. Iden-tify the main roads in the community that provide access. Note other in-frastructure that surrounds it. If it is a trail, it should show how it links to other recreational amenities or other trails (if applicable).
□ W-9 Form (Required)	Required in order to create state vendor numbers for payments.
☐ Applicant Logo (Required)	Required for any promotion and reporting by the OOR.
Recreational site plan, engineering plans, or conceptual drawing (Required)	Required to show a recreational site plan, engineering plans, or conceptual drawing with enough detail to determine design details such as orien-tation and layout of the project itself.
Letter of support from the local tourism or economic development office (Required for UORG Tier 1 and Regional Asset Tier only)	Required: Economic Development/Tourism: The project must have at least one of the following: (1) An endorsement from the local tourism office stating that the project has the potential to increase tourism to the area, or (2) A statement from the local economic development office that the pro-ject has the ability to help attract growth and retention of residents and businesses in the community/area. Either way, the project must fit the qualifications of Utah Code Annotated Title 63N, Chapter 9, Part 2.
□ Statement of Responsibility (Required)	The statement can be in the form of a letter and should be written, signed, and dated by the appropriate leader of the organization who will be responsible for the long-term maintenance of the infrastructure project for at least 10 years. The Statement of Responsibility should answer these questions: What are the plans for both the short and long-term maintenance of the infrastructure? Which entity will be responsible for the long-term maintenance of the infrastructure, including covering the annual maintenance costs? Who accepts the legal responsibility for the built infrastructure?
☐ Letters of support from project partners (If applicable)	Letters of support from each project partner show commitment, support, and approval of the project. This should be personalized and not a form fill letter. If the applicant has no partners for the project, this is not a re-quirement.
□ Letter of support from the community (recommended)	Letters of support from the community can underscore the importance of the infrastructure. As each project is so different, we leave it to each ap-plicant to help build the case for why their project should receive grant funding. The applicant should reach out to appropriate organizations, businesses or entities for some strong and individualized recommendations showing support for the project. Please note that members of our grant advisory committee cannot write letters of support.

	No.
□ Budget Spreadsheet (Required)	(Download a template of the spreadsheet off of the OOR grants website. It is also included in this program guide.) Budget/Costs/Matching Requirements: The Office of Outdoor Recreation will not fund more than 50 percent of the proposed project's eligible costs. A minimum of 25 percent of the total project costs must be a cash match from the applicant and/or partners. Secured Funds: At least 75 percent of the matching funds for the project must be secured in order to apply. Other grants and/or funding from partners may be used as part of the match but the applicant should show their commitment by dedicating funds to the project as well.
☐ Written confirmation of donations from financial partners (If applicable)	Provide written confirmation of donations from any partners who will be providing cash or in-kind donations for the construction of the project. This information can be included in a letter of support from financial partners or contributing sponsors.
□ Timeline (Required)	Download a copy of the timeline on the OOR grants website. Grantees are allowed up to 24 months from the contract signing date for completion of the project. Give detailed explanations on how the project will be constructed, what work will be done each month, and by whom.
□ MOU or landowner agreement (If applicable)	Land Owner Agreement(s): If the property is wholly owned and managed by the grant applicant, such as a local or tribal government, an agreement is not needed. Otherwise: Private property: If you have a trail that will go through private property, you'll need to provide a copy of a Memorandum of Understanding with the landowner, the Grant of Easement, a copy of a lease, or other relevant documentation. Public property: If your project is being built on public land, provide a copy of the agreement with the appropriate land manager. Additionally, we HIGHLY recommend that if this project or trail is being built on public land the local land manager (e.g. the BLM, National Forest Service, etc.) is one of the active project partners.
☐ Federal permits or a letter stating their status (If applicable)	Sensitive Wildlife Areas: All applicants must check the Utah Division of Wildlife Resources (DWR) Sage Grouse Management Area (SGMA) map at https://bit.ly/2N6cov3 to determine if their project is located within an SGMA. If the project occurs within an SGMA, the project applicant must coordinate with DWR to make reasonable accommodations to avoid, minimize, or mitigate the impacts to greater sage grouse and their habitats. Other examples of sensitive species in Utah include prairie dogs and desert tortoises. Applicants should visit DWR's website (http://bit.ly/2ldLNEt) to view information on sensitive species specific to your particular project area. Direct questions to Sarah Lindsey of DWR (sarahlindsey@utah.gov). Note: It can take up to two weeks to process your inquiry. Please plan accordingly
